

Hamburg, December 20

Product discontinuation of DURAG compact flame monitor D-LX 100

Dear valued customer,

For 22 years we have successfully been marketing our compact flame monitor D-LX 100. Thank you for having chosen the D-LX 100 in your company. We are working continuously on optimising our product portfolio. In January 2018, we have launched our new compact flame monitor D-LX 110/710 as successor product for the D-LX 100.

Herein we like to inform you that the D-LX 100 will be discontinued by December 31st, 2021. Should you need the D-LX 100, you will be able to order until September 30th, 2021, for delivery until end of 2021.

It is the policy of DURAG GmbH to realize repairs, delivery of spares and wear and tear parts for a period of 5 years after the date of discontinuation.

Successor product compact flame monitor D-LX 110/710

As successor product we offer the new compact flame monitor D-LX 110/710, which with its extended technical features can be used flexibly in an even more versatile number of projects.

Features of the D-LX 110/710

- Deployable from -40°C up to $+75/70^{\circ}\text{C}$, certified and without need for accessories to isolate, heat or cool
- Two channel control unit module for highest safety simultaneously with highest availability
- Two flame ON/OFF contacts for the flame signal (NO and NC)
- Variants for direct view or for combination with fibre optic systems, also for hazardous areas
- Local display: Operational status and settings visible at a single glance, for complete temperature range and all variants

For further information or if you have any questions please do not hesitate to contact us. The staff of our local sales offices will be pleased to advice you.

Best regards,

i.A. Dr. Cornelius Wuelker
Product Management DURAG GmbH
